

RE Denial of instant traffic and weather reports on XM radio
I find it appalling that as an American I could be denied commercial services, services for which I am paying for, for no other reason than to protect the special interests of the National Association of Broadcasters. If the US government has any shred of honor and principle, it will send this proposal back to the dustbin where it belongs.

Pickering and Green should be ashamed of themselves. This sort of thing is symptomatic of why the federal government is out of control in this country.
